ANNOUNCEMENT

New Switch Connection Design on Maxon Tuk-A-Way® GPTs

CONTROL SWITCH WIRING CONNECTIONS
FIG. 37-2

Beginning September 2015, new GPT units will come with new power units and a new switch connection design. The control switch wiring connections on GPT model gates are now routed so that the connections can be made inside the pump box assembly rather than at the trailer or truck body corner post area.

For specifics on this change, please refer to page 37 of the GPT Installation Manual titled "install control switch wiring".
